

Tech Lift M4

Self Supporting Open Platform Lift

The Swedish designed Tech Lift M4 open platform lift is an elegant easily installed way to provide access at the front or rear of a home up to 1.5 meters - it can even be used inside for a split level.

Based on 4 telescopic lifting columns means there is no need for a bulky mast on one side and efficient use of available space for a very reliable lift.

Available in both residential and commercial models.
